

Steps for Constructing a Hexagonal Star

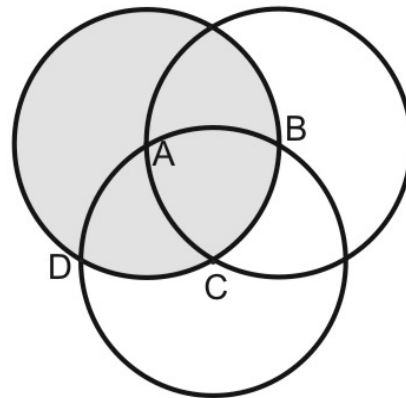

Step 1 - draw circle #1. Shade lightly to help you identify it easily.

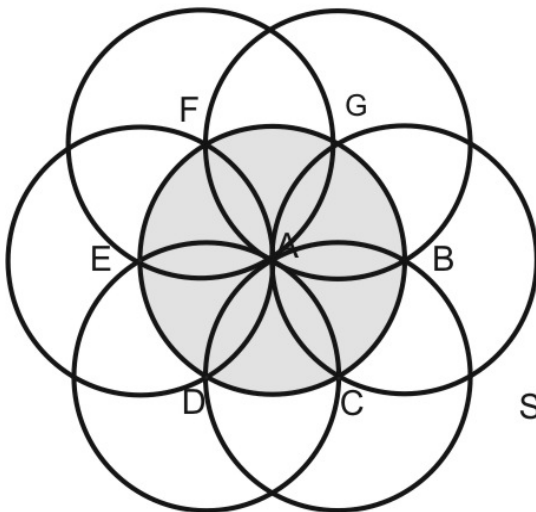

Step 2 - place a point on the perimeter

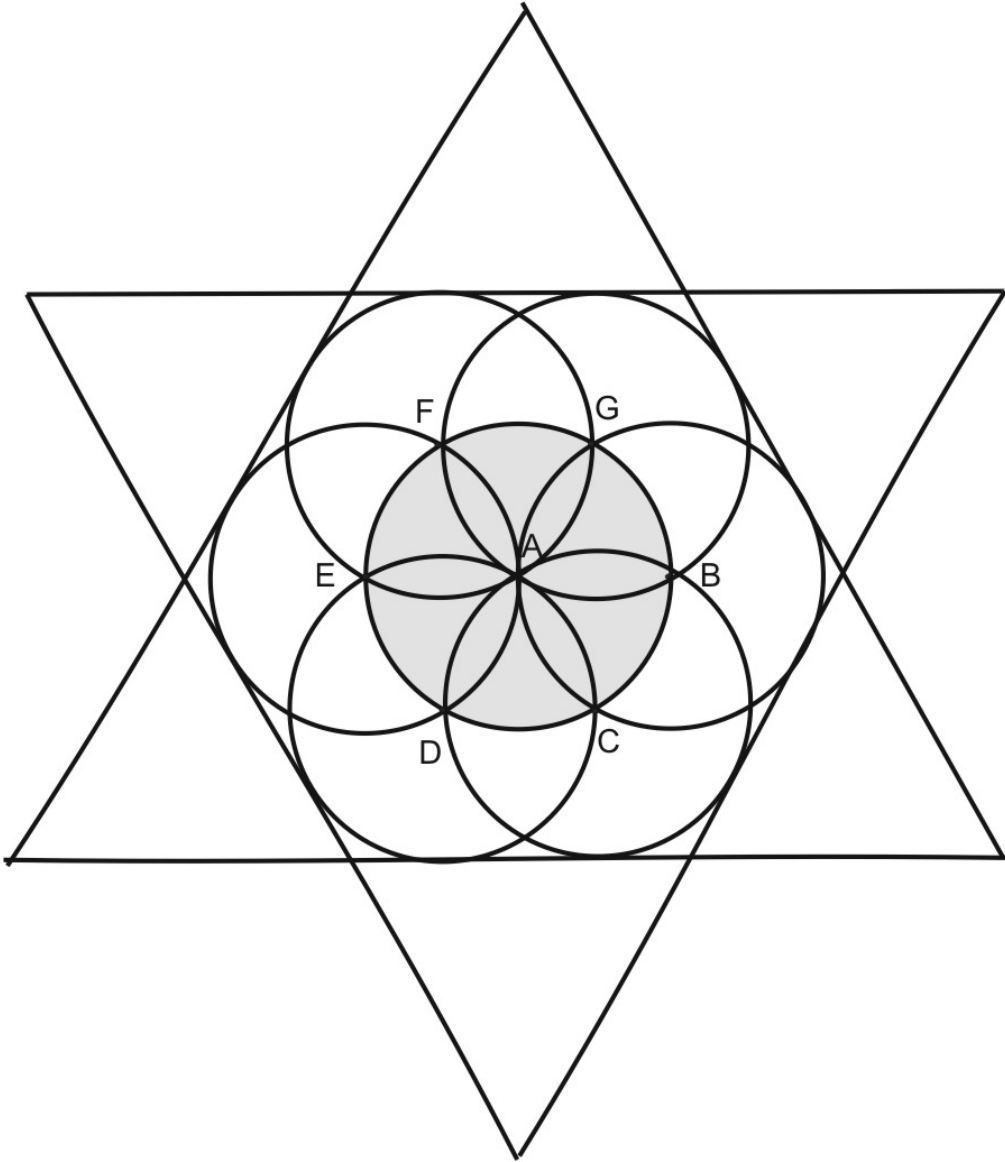

Step 3 - draw circle from point B

Step 4 - moving clockwise, draw a circle from point C

Steps 5 - 8 - continue moving clockwise drawing circles at points D, E, F, G

Step 9 - to make a hexagon draw rods touching each pair of adjacent circles

Step 10: For a 6 pointed star extend rods

Expand the design by adding circles, arcs or rods.
